

ENVIRONMENTAL PRODUCT DECLARATION

AERT, INC
914 JEFFERSON STREET
SPRINGDALE, AR 72764

RAW MATERIALS¹

Finished product is comprised of 50% Recycled Wood Products, 45% Recycled Plastics, and 5% Virgin Plastics for Color Additives. All recycled products are purchased from local and sustainable sources.

GREENHOUSE GAS SAVINGS²

119,497 MTCO₂-E/T (Annually). This is the equivalent of taking approx. 25,650 passenger vehicles off of the road in the U.S. every year.

WATER USAGE

1.5 Million Gallons recycled per day. Our process produces <2% of daily usages in Wastewater Discharge, and that amount is replaced by fresh water intake. Population equivalent to Fresh Water Conserved is approx. 15,000 people.

LANDFILL MINIMIZATION

Annually 100+ million pounds of what would be landfill waste are recycled and put into our finished products. This translates into approx. 7.5 football fields at 10ft deep.

ADDITIONAL INFORMATION

No PVC used in our manufacturing. Minimal packaging that can be returned to the producer for reuse.

¹ Raw Materials percentages are based on total amounts of each product used throughout the year.

² GHG Savings are based annual pounds of finished product, and compared to the Greenhouse Gas Emissions from Typical Passenger Vehicles.
